

ThermaSeat™

PRODUCT CATALOG

ThermaSeat™

ThermaSeat is a true story of the American Dream. A little over 30 years ago current President/Owner Peter Luccisano was preparing to leave for his annual hunting trip to the Berkshire Mountains in western Massachusetts. Anyone who has hunted here knows the climate and conditions can be harsh, comfort and warmth are a necessity. As he packed away his gear he noticed a tear in his traditional "hotseat" leaving the Styrofoam pellets all over the floor (We've all been there). At the time Peter was in the construction business and had some left over closed cell foam from a job that he decided to glue together to use as his seat for the week in the mountains. We'll just say the rest is history.

In the past 30 years we have expanded our product line, overcame lesser quality imports and knock offs, and remained a family owned, and operated business dedicated to providing a top-quality product to all outdoor enthusiasts. We design, develop, and manufacture all our products in the small mountain town of Peterborough, NH.
